

The Royal Academy  
of Engineering

## Creating a Forum for Engineering – Project Visualisations

### First Floor Lecture Theatre

The first floor Lecture Theatre will host distinguished speakers from the UK and overseas

This will be the first time the Academy has had a lecture theatre of its own. With a capacity of 150, it will be a vital tool in bringing engineering to wider audiences, allowing the Academy, its partner organisations and stakeholders to stage a full, varied programme of events covering a wide range of issues.
